DETAILED ACTION

1. Response/amendment filed 1-14-02 and 4-10-02 have been entered.
2. Claims 1-29, 31-33, and 35-55 have been cancelled.
3. New claims 56-80 have been entered.
4. The request filed on 3-12-02 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/340,283 is acceptable and a CPA has been established. An action on the CPA follows.

Election/Restrictions

5. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 56-59, 64-80, drawn to a method of screening for an agent that modulates anxiety wherein the agent binds to PKC-epsilon and wherein the method is carried out in vitro or in vivo, classified in class 800, subclass 3.
 - II. Claims 60-63, drawn to a method of screening for an agent that modulates anxiety wherein the agent binds to a PKC-epsilon binding partner, classified in class 435, subclass 6.
6. Inventions of the groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the method of group I uses PKC-epsilon as the substrate to which a test agent binds and modulates the activity of PKC-epsilon. On the other hand the method of group II uses PKC-epsilon binding partner (such as a PKC substrate) as the substrate for screening the test agents. In other words, the substrate of group I can not be used in practicing the method of

Art Unit: 1632

group II and an agent identified by method of group I would not function in the method of group II.

7. Because these inventions are distinct for the reasons given above, have acquired a separate status in the art shown by their different classification and their recognized divergent subject matter, and because each invention requires a separate, non-coextensive search, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

When amending claims, applicants are advised to submit a clean version of each amended claim (without underlining and bracketing) according to § 1.121(c). For instructions, Applicants are referred to <http://www.uspto.gov/web/offices/dcom/olia/aipa/index.htm>.

Applicants are also requested to submit a copy of all the pending/under consideration claims.
